Agentic AI DMAIC Copilot - DEFINE Phase

Active Project ID: proj_003

Loaded DEFINE (Final)

DEFINE PHASE SUMMARY — proj_003_ Late_delivery

Problem Statement

It's been more than 3 times that shipments to customer AAJ in Jakarta are consistently late, averaging 5-6 days beyond the scheduled delivery date.

Goal Statement

Achieve 100% on-time delivery with no late shipments.

Business Case

Improving delivery timeliness will enhance customer satisfaction, reduce complaints, and potentially increase repeat business, leading to higher profitability.

Scope

- In Scope: Supply chain operations, Logistics and delivery processes, Scheduling and tracking improvements, Training for staff involved in delivery, Production processes related to delivery schedules
- Out of Scope: Supplier management outside of delivery impact, Non-logistics related customer service issues

CTQs

- On-Time Delivery Rate**(Number of on-time deliveries %) — The percentage of shipments delivered to the customer on or before the scheduled delivery date.
- Average Delay Duration**(Average delay in days days) — The average number of days that shipments are delayed beyond the scheduled delivery date.
- Customer Satisfaction Score**(Customer satisfaction rating scale (1-10)) — A measure of customer satisfaction regarding the timeliness of delivery.

Y Variable

On-Time Delivery Rate

X Categories (6M)

Man

- Training for logistics and delivery personnel
- Staffing levels in the supply chain department

Machine

- Condition of delivery vehicles

- Tracking systems for shipments

Method

- Scheduling and routing procedures
- Standard operating procedures for order processing

Material

- Quality and reliability of packaging materials
- Availability of inventory for timely shipments

Measurement

- Tracking of delivery times and delays
- Customer feedback mechanisms

Environment

- Traffic conditions in Jakarta
- Weather-related disruptions

SIPOC

Suppliers

- Raw material suppliers
- Logistics partners

Inputs

- Orders from customers
- Inventory
- Delivery schedules

Process

- Order processing
- Logistics planning
- Delivery execution

Outputs

- Delivered products to customers

Customers

- End customers
- Retailers

Early Measurement Plan

- Measures: Monitor on-time delivery rates weekly, Track average delay durations bi-weekly, Conduct customer satisfaction surveys monthly
- Responsible: Supply Chain Management Team
- Frequency: (not provided)
- Data Source: (not provided)

Risk & Project Type

- Risk Level: Medium

- Project Type: Process Improvement

Fase **Define** menggunakan Agentic AI dengan 4 kemampuan: **Perception** → **Decision-Making** → **Action** → **Adaptation**
Masukkan informasi proyek, lalu agent akan menghasilkan charter yang lengkap, SIPOC, CTQ, dan business case.

DEFINE PHASE SUMMARY — proj_003_ Late_delivery

Problem Statement

It's been more than 3 times that shipments to customers in Jakarta are consistently late, averaging 5-6 days beyond the scheduled delivery date.

Goal Statement

Achieve 100% on-time delivery with no more late shipments.

Business Case

Improving on-time delivery will enhance customer satisfaction, reduce complaints, and strengthen the company's reputation in the manufacturing industry, ultimately leading to increased sales and customer loyalty.

Scope

- In Scope: Logistics and transportation processes, Communication protocols with customers regarding delivery, Training programs for staff involved in supply chain management
- Out of Scope: Supplier management outside of logistics, Production processes unrelated to shipping and delivery

CTQs

- **On-Time Delivery Rate**(Percentage of on-time deliveries %) — The percentage of shipments delivered on or before the scheduled delivery date.
- **Average Delay Duration**(Average delay in days days) — The average number of days shipments are delayed beyond the scheduled delivery date.
- **Customer Satisfaction Score**(Customer satisfaction rating scale of 1-10) — The score reflecting customer satisfaction regarding the timeliness of deliveries.

Agent Insight**Agent Insight****Agent Insight**

- **Justification of CTQ/Y/Scope:** The primary CTQ, "On-Time Delivery Rate," directly addresses the core issue of late shipments, which has been identified as a significant pain point for customers in Jakarta. The scope focuses on logistics and communication, which are critical to improving delivery performance.
- **Key Risks/Assumptions:**
 - Assumes that improving logistics training and communication will lead to better on-time delivery rates.
 - Risks include potential disruptions from external factors like traffic and weather, which may not be fully controllable.
- **Learning from Similar Episodes:** Past projects in the manufacturing sector have shown that enhancing communication protocols and staff training significantly improved delivery performance and customer satisfaction. Consistent application of Lean methodologies has also proven effective in streamlining processes.
- **Actionable Next Steps for Measure:**
 1. Establish baseline metrics for the "On-Time Delivery Rate" and "Average Delay Duration" to quantify current performance.
 2. Develop a customer feedback mechanism to assess satisfaction regarding delivery timeliness and communication.
 3. Conduct a training needs assessment for logistics staff to identify gaps in scheduling and delivery processes.
