Problem Statement (raw)

A/R is part of cashflow performance. In 2016, 36.20% of total A/R overdue in ID03 was trigger by PT Smart, so we will focus on this customer for this project.
High A/R overdue shows that a company is selling its product to customer on credit and taking longer to collect money. It means company has less readily available cash to finance our operation. In addition, high A/R overdue

Goal (raw, optional)

Reduce monthly overdue A/R PT Smart to 12.8 % by end of Nov 2017.

Voice of Customer (one per line)

True Need / Key Issue (optional)

A/R Overdue

Feedback for next draft (optional)
